WORK EXPERIENCE

Freelance Full Stack Developer

Dec 2025 – Jan 2026

Dukaan Dost · Maharashtra, India

- Designed and developed a full-stack order management and dispatch automation system for a Maharashtra-based company.
- Built end-to-end workflows for order creation, status tracking, and automated dispatch processing using the MERN stack.
- Implemented secure REST APIs, role-based access control (RBAC), and real-time order status updates to streamline operations.
- Automated backend workflows to reduce manual operational effort and dispatch delays, improving overall process efficiency.
- Collaborated directly with business stakeholders to gather requirements and deliver a production-ready solution.

Software Engineer

Sep 2025 – Present

UClean · India

- Working as a Software Developer on production-grade web applications used by internal teams and franchise partners.
- Developing and maintaining scalable frontend and backend features using modern JavaScript frameworks and REST APIs.
- Collaborating with product, operations, and QA teams to deliver stable releases and resolve production issues.
- Optimizing application performance, system reliability, and overall user experience through continuous improvements.

Software Development Engineer (SDE)

Jul 2025 – Sep 2025

Remassis · India

- Promoted to Software Development Engineer based on performance and ownership of critical modules.
- Led feature development across frontend and backend components of a client-based Learning Management System (LMS).
- Implemented optimized APIs, improved data handling, and enhanced role-based access control mechanisms.
- Contributed to architectural discussions and supported junior trainees with code reviews and guidance.

Software Developer Trainee

Dec 2024 – Jul 2025

Remassis · India

- Worked as a Full Stack Developer on a MERN-based Learning Management System focusing on course and user management.
- Developed secure authentication workflows including login, password reset, and role-based access control (RBAC).
- Built responsive dashboards with analytics features for administrators and learners.
- Implemented automated email notification systems to improve user communication and system alerts.
- Collaborated with senior developers to ensure scalable backend services and clean code practices.

Freelance Full Stack Developer

Aug 2024 – Dec 2024

Datatribе (Startup) · Remote

- Delivered end-to-end full stack features for a startup in a fast-paced, requirement-driven environment.
- Built reusable frontend components and integrated backend APIs for business workflows.
- Worked directly with founders to gather requirements and deliver production-ready solutions.
- Improved application performance and maintainability through refactoring and optimization.

Full Stack Developer Intern

May 2024 – Aug 2024

Siteup · Jamshedpur, India

- Developed and maintained full-stack web applications, improving application speed by 20%.
- Designed reusable UI components, reducing development effort by 25%.
- Debugged and resolved critical issues, lowering user-reported bugs by 15%.
- Followed best practices in clean code, testing, and deployment workflows.

SKILLS

Technical: Java, JavaScript, HTML5, CSS3, React.js, Next.js, React Native, Angular, Node.js, Express.js, Redux, Tailwind CSS, MUI, MongoDB, SQL, VS Code, npm, Git, GitHub, Postman, Netlify, Vercel, REST API Integration and Design, Data Structures and Algorithms, Object-Oriented Programming (OOP), Problem-Solving, C++, C

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering Chaibasa Engineering College · GPA 7.85	2020 – 2024
Intermediate in Science Ssnms Inter College · GPA 63.6%	2017 – 2019

PROJECTS

Life & Launch Full-Stack Blog Website Link Developed a fully functional blog website with Next.js and Tailwind CSS, featuring blog categories, search functionality, and email subscriptions. - Created a secure admin dashboard for streamlined content management, including post creation, updates, and deletion. - Integrated Nodemailer for email notifications and React-Toastify for real-time user feedback. - Used Mongoose with MongoDB for data handling and Axios for efficient API requests.	<i>Next.js, Tailwind CSS, Axios, React-Toastify</i>
--	---

Chit-chat Link Built Chit-chat, a social media platform leveraging React.js for frontend development and Node.js with Express.js for backend services. - Implemented features for user account management, including post creation, image uploads, and interactive functionalities. Increased user engagement by 40% through these enhancements. - Integrated MongoDB for database management, Material-UI for responsive design, Redux Toolkit for state management, and Cloudinary for image storage and processing. - Enhanced app performance by 35% and reduced image load times by 50%, resulting in a 25% increase in user satisfaction.	<i>React.js, Node.js, Express.js, MongoDB</i>
